Advertising method and system through internet Alerting Abstract ...NOVELTY - An advertisement method and a system through the internet are provided so that an advertiser can obtain detail information about customers besides numerical information such as

homepage visit number or... ..company manages the service web server(6). The PC receives internet service by using a web browser program(10) which has an advertisement window program(8). The advertisement window program(8) outputs moving picture or flash moving picture... ..the moving picture, and transmits the results according to response of the user to an advertisement response collecting server(12). The service web server(advertisement server)(6) includes an advertisement transmitting server(14), an advertisement response collecting server(12) and an advertisement response managing database(16). The advertisement transmitting server(14) transmits the entrusted advertisement program to homepage of the advertisement server or web screen of sub menu. The advertisement transmitting server(14) can receive the advertisement content produced by advertisers on on-line or on off-line, and classifies the advertisement content according to user information and user response information.
